DETAILED ACTION

Election/Restriction

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-9, drawn to an interrogator with an antenna for receiving and transmitting signal and a power amplifier for amplifying signal, classified in class 455, subclass 108.

Group II, claims 10-20, drawn to an interrogator with three antennas for transmitting or receiving signals, classified in class 455, subclass 103.

2. The inventions are distinct, each from the other because of the following reasons:

Invention II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require a power amplifier. The subcombination has separate utility such as power amplifying the radio frequency transmitter signal.

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the search require for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Paul Skwierawski on September 11, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
